

FI-AK

Unidirectional Antenna

Product Applications

- This is the ideal antenna solution for multichannel wireless microphone setup. It's also great for stage situations in which multiple wireless microphone channel will be used at the same time.

Unidirectional receiving antenna, can effectively reduce the interference of other equipment to the receiver

High gain design, effectively increase the receiving range

Built-in 4-stage gain control antenna amplifier

Wide band, covering all wireless microphone UHF bands

Product Features

- Unidirectional receiving antenna, can effectively reduce the interference of
- other equipment to the receiver
- High gain design, effectively increase the receiving range
- Built-in 4-stage gain control antenna amplifier
- Wide band, covering all wireless microphone UHF bands

Product Specification

System	
Frequency range	450MHz ~ 950MHz
Antenna Gain	4 ~ 6dB
Directivity	Unidirectional
Effective Angle	100°
Internal Amplifier Gain	-6dB / 0dB / 6dB / 12dB
Internal Amplifier Noise Factor	1.5dB
Standing Wave Ratio	<1.3
Physical	
Output Interface	BNC×1
Display Mode	LED×4
Power Requirements	5 ~ 12V/0.1A
Working Temperature	-10 ~ 50 °C
Dimension	352*346*25mm
Weight	320g
