

FI-SP

4 Channel Antenna Combiner

Low noise amplifier circuit design

Low insertion consumption, high separation design

Built-in 4-channel power distributor

Product Features

- Low noise amplifier circuit design
- Low insertion consumption, high separation design
- Built-in 4-channel power distributor

Product Applications

- This is the ideal antenna solution for multichannel wireless microphone setup. It's also great for stage situations in which multiple wireless microphone channel will be used at the same time.

Product Specification

System	
Frequency range	450MHz ~ 950MHz
Insertion Loss	2-4dB
Internal Amplifier Gain	6dB
Internal Amplifier Noise Factor	1.5dB
Output Interface Isolation	>30dB
Physical	
Input Interface	BNCx2
Output Interface	BNCx10
