

FS2 Array

3-inch Array Speaker

The FS2X3 has a minimalistic and compact design allowing it to be used in high-end designs and occasions.

The FS2X3 has 2 tailor made 3.25-inch full range speakers by an Italian company, SICA. With its extremely wide frequency range and power density, the FS2X3 is often used in conference halls, classrooms or anywhere that needs voice amplification. A preferred product because of its aesthetics and easy concealment.

With the compact shape of FS2X3, it is very suitable for smaller spaces.
